

Aphorisms of eminent medical scientists on oxygen

- **Hideyo Noguchi** (famous for the discovery of medical doctor, syphilis and study of yellow fever)
The cause of all diseases is oxygen deficiency.
- **Dr. Henderson** (professor, Columbia University)
Cancer is the cause of carbon monoxide poisoning.
- **Hiroshi Osanai** (former Director, Institute of Labour Science)
Cancer cells proliferate in cells with insufficient oxygen, stroke, heart disease, arteriosclerosis, liver disease and uterine fibroids are the biggest cause of lack of oxygen.
- **Otto World** (Germany Nobel Prize in Medicine)
The cause of cancer is due to lack of oxygen.
- **Worlburg** (Germany Nobel Prize in Medicine)
The cause of cancer is due to the deficiency of oxygen.
- **Shigeru Asano** (head of the National Institute of Public Health)
Oxygen has a good blood circulation and prevents arteriosclerosis
- **Shunichi Yoshimatsu** (Koshoku Central Hospital)
Oxygen is effective in preventing aging and blurring.
- **Takenori Kikuchi** (Associate Professor, Tokyo Women's Medical University)
Oxygen has a significant effect on the prevention and improvement of hypertension.
- **Shinichi Tanimoto** (Department of Respiratory Surgery, Toranomon Hospital)
Oxygen has a significant effect on Zensok and fatigue recovery.
- **Takara Yoshida** (University of Tsukuba)
If the oxygen is fully incorporated, the lung function is improved.
- **La all Estrella** (France Doctor of Medicine)
The cause of all these diseases will be known to be the one to cause the toxin with the fearful name of carbon monoxide if it researches individually about the cause of various diseases.
